

## ENV-24-01: Installation of Mooring Pilings for Waterwheel

**Closing date January 18, 2024, 01:30 PM**

**Summary:** Proposals are being accepted by the City of Fort Worth for the installation of mooring pilings, site preparation, and the unloading, unpacking, and installation of one (1) “waterwheel” aquatic floatable trash interceptor/collector located in the Clear Fork of the Trinity River.

**Project Description:** The purpose of this Request for Proposals (RFP) is to establish an agreement for the furnishing of all labor, materials, services and equipment necessary for the installation of mooring pilings, site preparation, and the unloading, unpacking, and installation of one (1) “waterwheel” aquatic floatable trash interceptor/collector system located in the Clear Fork of the Trinity River. Refer to section 2.5 Scope of Work for a more detailed description. The engineer’s estimated costs for turn-key completion of this project is approximately \$614,000.

\*The usage of a “floatable barge” on the Trinity River to convey the necessary equipment to the worksite for the installation of any and all mooring pilings will be required per the current permit with the United States Army Corps of Engineers (USACE).

**Pre-Proposal Meeting:** A Pre-Proposal meeting is scheduled for December 5, 2023 at 10 a.m. at the Environmental Services Department Environmental Quality Division offices located at 908 Monroe Street, City Hall Annex, 7th Floor Conference Room, Fort Worth, Texas 76102. The purpose of the meeting is to allow potential proposers to ask questions and request clarifications. The meeting is not mandatory, but is recommended. Virtual attendance option will also be available through Microsoft TEAMS.
